Dialup Instructions for Windows 7

The following instructions will allow you to setup your computer for use with Midcoast Internet Solutions through your modem.

Note: Please be sure the telephone cord is already connected to the wall jack and computer.

Midcoast Internet Solutions may not be held responsible for any problems caused by this configuration.

(Window A)

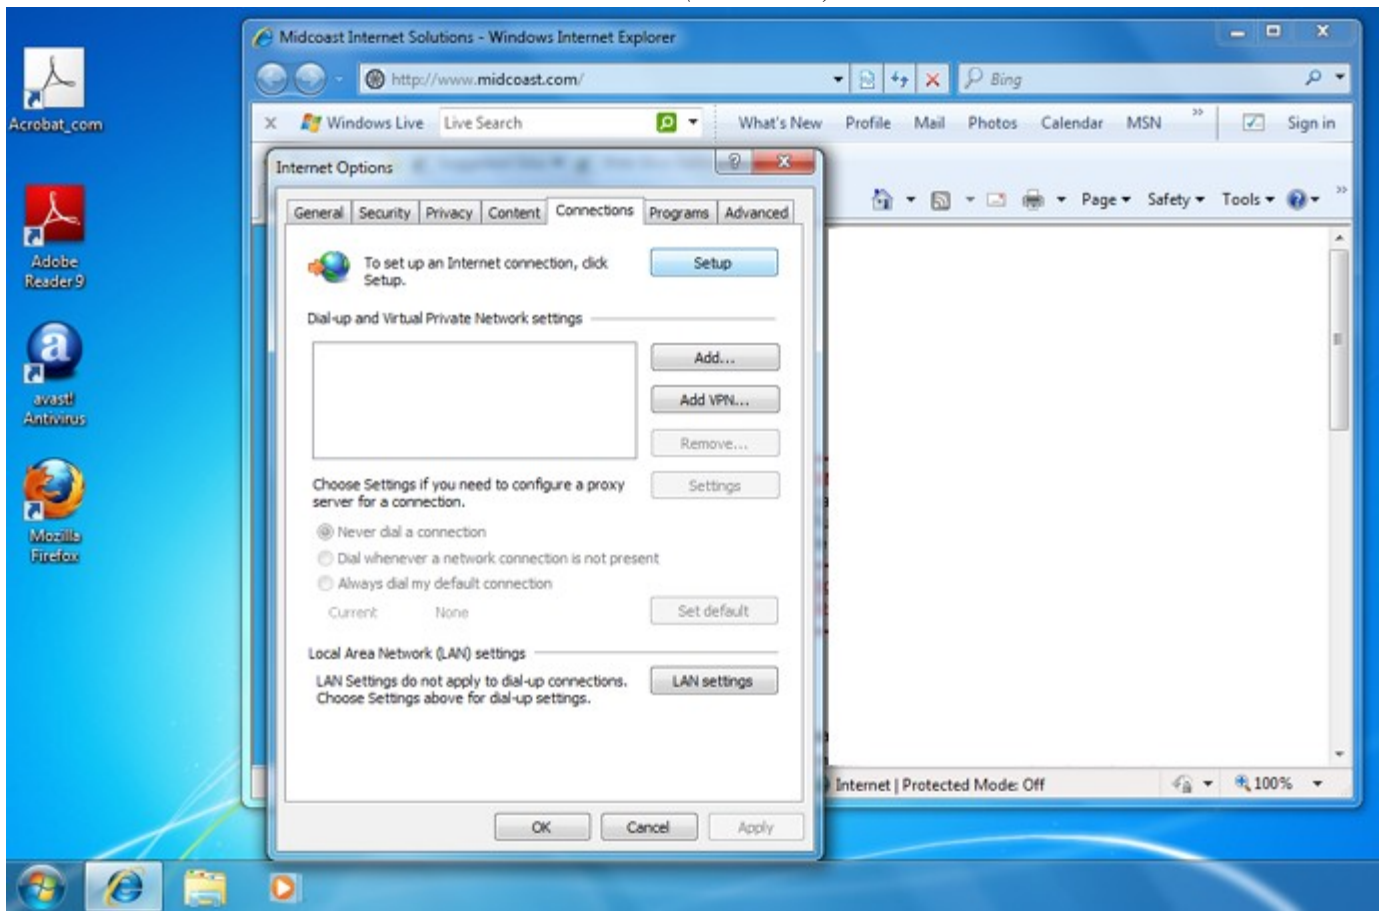

Open the program Internet Explorer. It is the lowercase blue “e” in the bottom left hand corner of the screen

Click on Tools in the upper right hand corner and then click on Internet Options at the bottom of the menu.

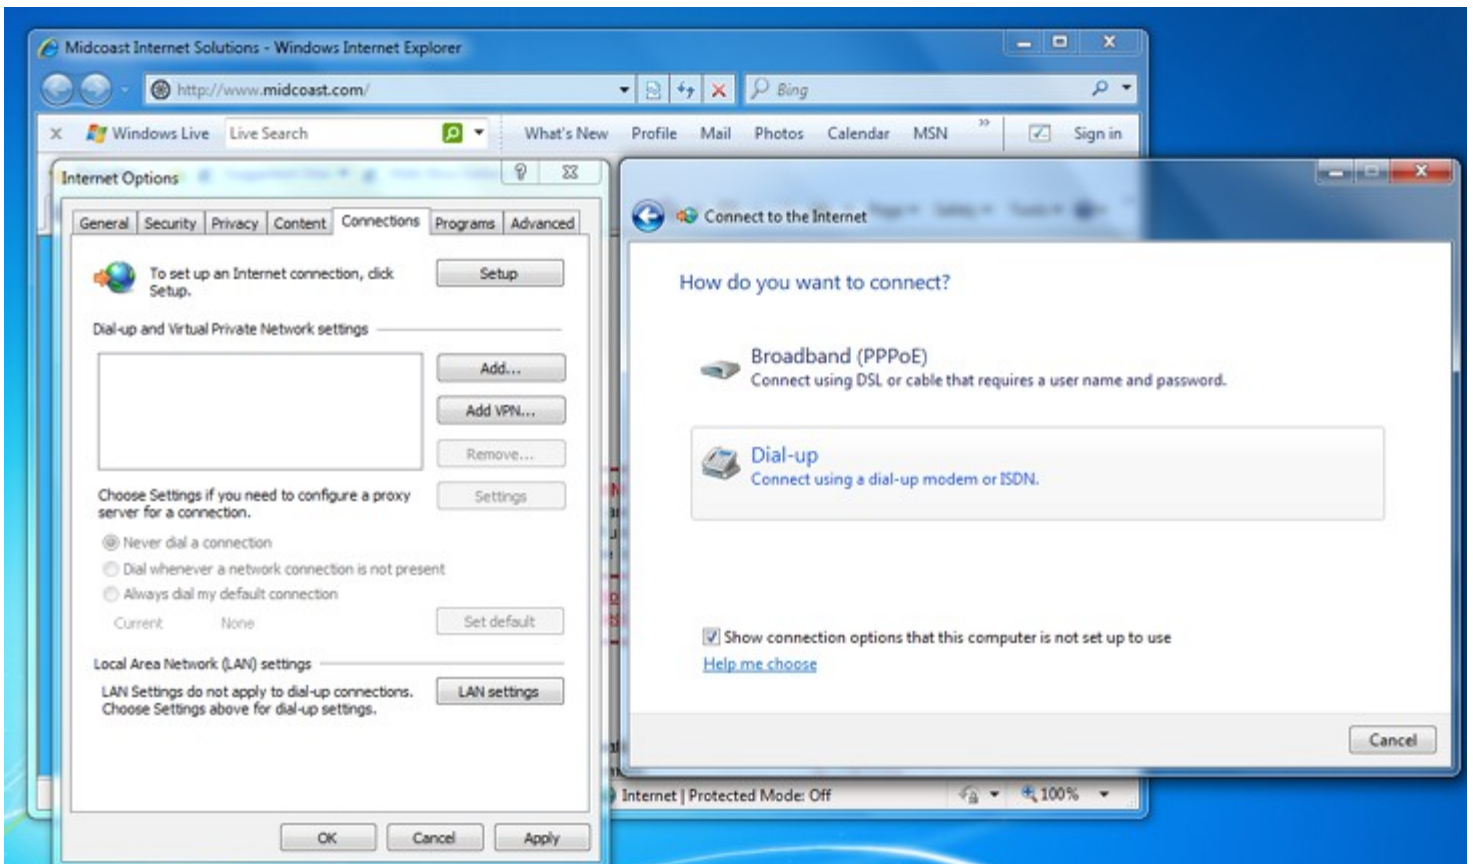

(See Window A.)

(Window B)

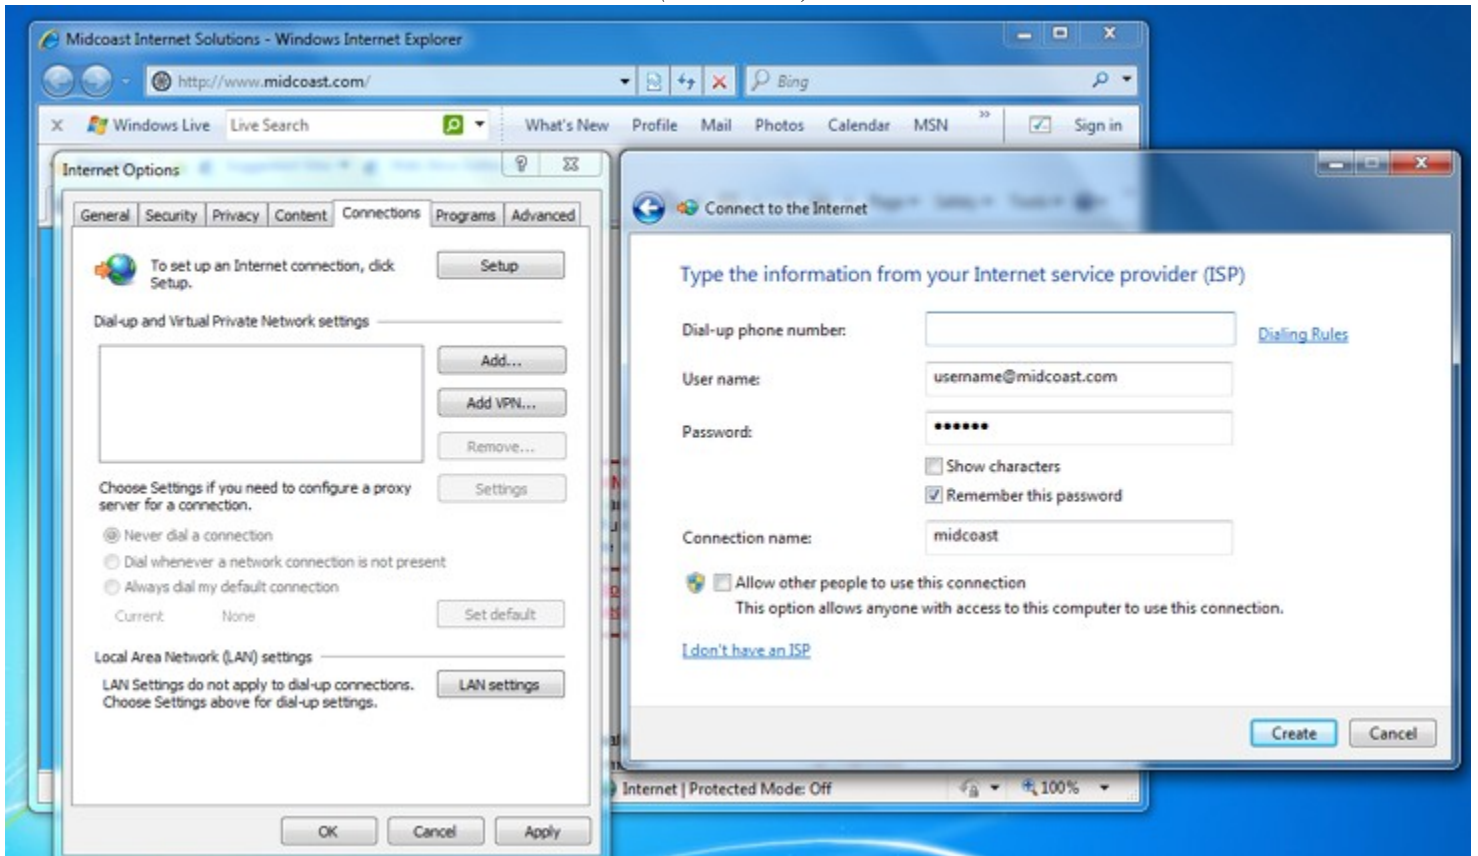

Click on the “Connections” Tab
Click on the “Setup” button at the top of the window. (See Window B.)

(Window C)

On the “Connect to the Internet” window click on “Dial-up” button. (See Window C.)

(Window D)

In the “Dial-up phone number:” field, put the telephone number from the list provided that is local for you. **Please be sure to choose a local number for your area.**

Midcoast Internet Solutions will not be held responsible for any long distance charges.

In the “User name:” field, put your midcoast.com e-mail address.

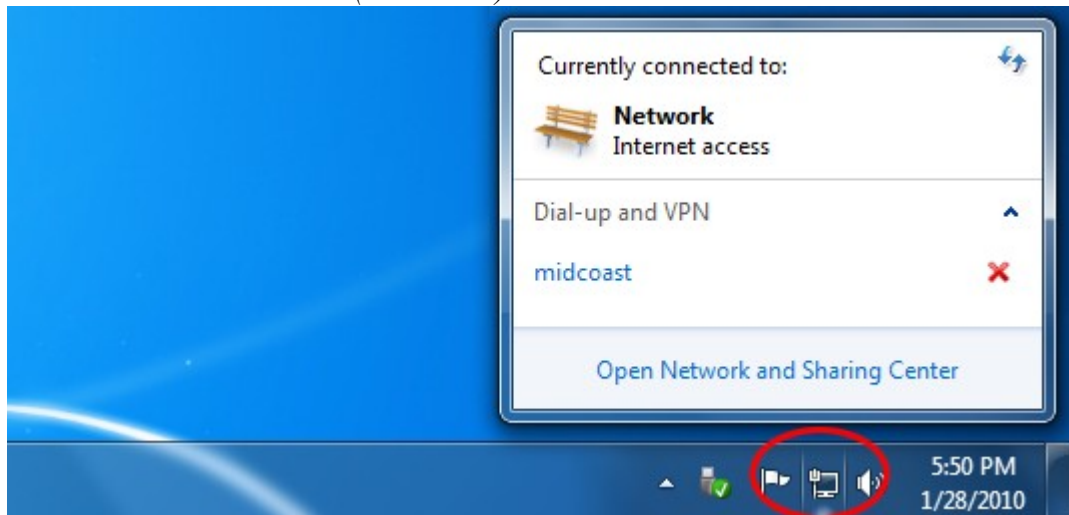

In the “Password:” field, put your password for your midcoast account.

Put a check mark in the “Remember this password” field.

In the “Connection name:” field, type in midcoast

Click “Create.” (See Window D.)

(Window E)

To reconnect to this dial-up connection in the future, click the Network Connection icon in the bottom-right hand corner of the task bar, click midcoast **Dial-up Connection**, and then click the connection button. (See Window E.)
